

EVAstream Move

The EVAstream Move is the world's first powerful, fully wireless, battery-powered counter-current swim machine.

Without cables or construction work, it transforms any existing pool into a complete swimming facility in just a few minutes. Pool owners who previously had no access to counter-current technology can now rediscover their pool and unlock its full potential.

- **Plug & Play**

Easy to move and install by one person, ready for use within just a few minutes.

- **Swim for non-stop 1 to 4 hours**

Fully recharges in 4 hours using a standard power outlet.

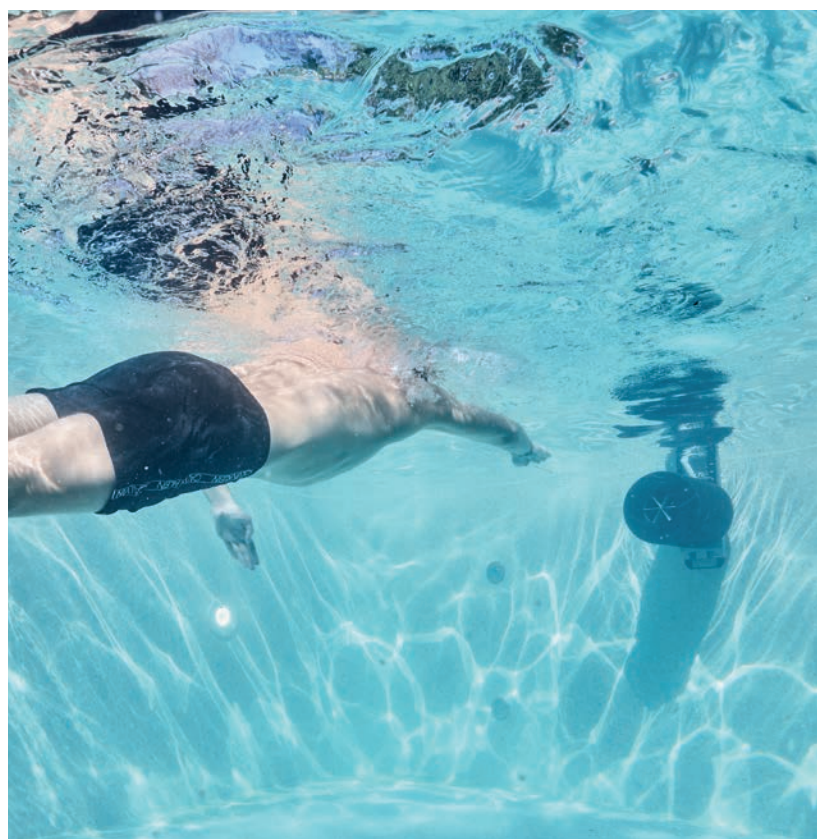

- **Up to 30% stronger water flow**

Patented turbine design delivers a stronger, far-reaching water flow.

- **Whisper-quiet and vibration-free**

The quietest swimmachine, thanks to the sealed motor design and precision ball bearing system.

Winner of the Red Dot Design Award

The EVAstream Move received the prestigious Red Dot Design Award for its innovative, user-friendly, and aesthetic design.

What makes the EVAstream Move stand out?

- **Flexible use**
Can be used anytime and anywhere. After use, the unit can be easily removed and stored.
- **EVA Web App standard included**
Effortless control of the EVAstream Move from any smartphone or tablet, regardless of operating system or with the Remote Basic.
- **Equipped with the ECA Control 2 Trainer**
Comes standard with 3 preprogrammed swim workouts.
- **Complies with international safety standards**
Meets requirements for electrical safety and hair & entrapment protection for both private (DIN EN16582-1/2/3, EN16713-2) and public pools (EN13451-1/3).
